WARNING

The Truth About Battle Motors Setting The Record Straight on a COVID-Era Success Story

When the COVID-19 pandemic sent shockwaves through the commercial truck industry, fleet operators found themselves in an impossible situation. Truck prices skyrocketed while availability plummeted to historic lows. Traditional manufacturers couldn't keep up with demand, leaving businesses scrambling for solutions. Enter Battle Motors (also known as Crane Carrier Corp) – a company that emerged during this crisis as a lifeline for the refuse and vocational truck market.

The Perfect Storm and an Unlikely Hero:

During those unprecedented COVID years, Battle Motors became the only viable option for many fleet operators who desperately needed trucks to keep their operations running. The established truck dealers recognized this too. Suddenly, dealerships that had built their reputations on century-old brands were adding Battle Motors to their showrooms. Why? Because they had trucks available when no one else did. Battle Motors delivered when the industry's giants couldn't.

The Convenient Change of Tune:

Now that traditional truck inventory has normalized and dealers' lots are full again, we're witnessing a troubling trend. Many of these same dealers who enthusiastically sold Battle Motors trucks just yesterday are now singing a very different tune. They're claiming Battle Motors can't keep up with parts and service, pointing out flaws, and steering customers back toward their traditional product lines.

Established truck dealerships are all pushing the same narrative:

Come back to what we've always sold. Let's call this what it is: a transparent attempt to reclaim the customer base they lost during the shortage.

The Truth About Battle Motors:

Yes, Battle Motors has had some issues – what new manufacturer doesn't? We're talking about relatively minor problems:

- A ground strap issue
- Power steering reservoirs mounted in less-than-ideal locations
- Fuse panel connection issues during the supply chain crisis
- Other small, manageable concerns

Here's the critical context these dealers conveniently omit:

Battle Motors has been incredibly responsive and proactive about addressing these issues as they arise. The company has been in production for only about three and a half to four years. Compare that to manufacturers who've had literally a century to refine their products, and the Battle Motors track record looks remarkably strong. These aren't catastrophic design flaws – they're the normal growing pains of a young company that's willing to listen, adapt, and improve.

Understanding the Real Motive:

Why are established truck dealers so eager to bad-mouth Battle Motors now? In our opinion, the answer is simple: they're worried. Worried that once you experience a Battle Motors truck and see how well it performs, you won't come back to their traditional brands. Worried that they've inadvertently introduced their customers to a competitor that offers real value.

The timing tells the story:

When these dealers needed Battle Motors to keep their sales flowing, the trucks were great. Now that they can sell their traditional brands again, suddenly Battle Motors has problems? The hypocrisy is glaring.

A Message to Fleet Operators:

Don't let traditional dealers rewrite history to suit their current inventory situation. Remember who was there for you during the shortage. Remember which company delivered trucks when you needed them most. And most importantly, don't let dealer politics override your own experience. If you've run Battle Motors trucks, you know the truth. Judge them on their performance in your fleet, not on the convenient narratives being spun by dealers with ulterior motives.

Battle Motors stepped up when the industry needed them most. That's worth remembering – and respecting.

Lease vs. Purchase Analysis

Refuse & Recycling Truck Fleet Solutions

1. A Strategic Comparison for Modern Fleet Management

Executive Summary:

When acquiring refuse and recycling trucks with specialized bodies, fleets face a critical decision between leasing and ownership. Overcome budget constraints with predictable, fixed annual costs.

Key Challenge:

The complexity of modern refuse vehicles—with sophisticated hydraulics, electrical systems, emission controls, and computer-managed components—makes this decision particularly significant.

This presentation examines both options to help you make an informed decision for your fleet.

2. The Complexity of Modern Refuse Vehicles

Today's refuse and recycling trucks represent some of the most technologically advanced commercial vehicles on the road.

Chassis Systems:

- Advanced emission controls
- Computer-managed engines
- Sophisticated diagnostics
- Complex electrical systems

Body Systems:

- Hydraulic controls
- Integrated electronics
- Computerized monitoring
- Specialized sensors

Result: Vehicles requiring computer-trained technicians and specialized diagnostic equipment.

3. Ownership Challenges

The Two-Warranty Problem: Traditional ownership involves navigating a fragmented warranty structure that creates significant operational challenges.

Chassis Warranty: OEM Dealer First year only

Body Warranty: Body Manufacturer Separate dealer

The Problem: Chassis dealers blame body issues. Body dealers point to chassis problems. You're caught in the middle with accusations of improper maintenance becoming the convenient explanation when neither party wants responsibility.

4. Technical Expertise & Maintenance Burden

Technical Expertise Requirement, Fleet operations must either:

Develop Internal Expertise:

- Hire specialized technicians
- Invest in diagnostic equipment
- Continuous training costs

Rely on External Providers:

- Multiple service relationships
- Limited accountability
- Coordination challenges

Maintenance Burden: Owners bear full responsibility for understanding and executing complex maintenance protocols. Even minor deviations from manufacturer specifications can void warranties and expose the fleet to major repair costs.

5. Three-Year Ownership Timeline

YEAR 1 - The Honeymoon Period, Manufacturer warranties provide some protection.

However:

- Navigating the two-warranty system creates friction
- Chassis and body dealers point fingers at each other
- Your trucks sit idle during warranty disputes
- Downtime impacts service delivery and revenue

Even in the best year of ownership, warranty fragmentation creates operational challenges and unexpected downtime.

★ **Info believed accurate but not guaranteed; specs and prices may change. We apologize for any errors.**

YEAR 2 - Reality Sets In, Warranty coverage expires or becomes severely limited

The fleet now bears increasing costs:

- Expensive emission system components begin to fail
- Sensors and computer modules require replacement
- Each failure requires specialized diagnostic expertise
- Repair bills hit your budget unexpectedly

Unpredictable repair expenses begin to impact financial planning.

YEAR 3 - Decisions, Maintenance and repair costs accelerate significantly

Critical Decisions Required: Invest in major repairs on vehicles approaching replacement age, or accept reduced reliability?

Residual Value Concerns: Technology becomes outdated, wear accumulates, resale value drops

The Difficult Choice: Continue pouring money into aging equipment OR navigate the challenges of disposing used refuse vehicles with uncertain maintenance history

Maximum cost uncertainty at the worst possible time.

6. Beyond Year Three - The Ongoing Ownership Dilemma

After the three-year mark, fleet managers face increasingly difficult decisions:

Option A: Keep Running

- Escalating maintenance costs
- Increasing reliability concerns
- Growing downtime issues
- Technology obsolescence
- Regulatory compliance risks

Option B: Dispose

- Finding buyers for used equipment
- Uncertain maintenance history impact
- Obsolete technology reduces value
- Time and effort to sell
- Need immediate replacement capital

Neither option is attractive. Both create financial strain and operational headaches.

7. The RDK Lease Solution - A Better Approach

RDK Three-Year Lease Program

A comprehensive solution that addresses every ownership pain point:

- Single Accountability - One party responsible for complete vehicle
- Training and Technical Support - Specialized training for your personnel and on-going technical support
- Fleet Partnership - Support beyond just leased units
- Financial Predictability - Fixed payments and predictable maintenance costs

7-a. Single Accountability

One Responsible Party for Everything - Whether the issue originates in the chassis, body, hydraulics, electrical system, or emissions controls—RDK handles it.

- No warranty blame game, No finger-pointing between chassis and body dealer
- Rapid problem resolution, Focus on getting trucks back in service, not determining fault
- Complete vehicle expertise, One team understands the entire integrated system

This eliminates the warranty blame game entirely.

★ **Info believed accurate but not guaranteed; specs and prices may change. We apologize for any errors.**

7-b. Training and Technical Support

Building Your Fleet's Competence - RDK provides specialized training and technical resources that transform your team's capabilities.

Training Programs:

- Specialized operator training for complex systems
- Basic maintenance procedures
- Preventive maintenance best practices
- Operator-induced issue prevention

Technical Resources:

- Sophisticated computer components supplied
- Advanced diagnostic sensors provided
- Expert technical support access
- Ongoing knowledge transfer

Knowledge transfer that builds internal capability while preventing costly mistakes.

7-c. Fleet-Wide Partnership

Support Beyond Just Leased Units - RDK's partnership extends across your entire refuse fleet, not just the vehicles under lease.

Maintenance Support for All Fleet Vehicles - Upon request, RDK provides maintenance guidance and support for your entire fleet, creating consistency in practices and standards across all vehicles.

Preferred Fleet Pricing - Partnership-level pricing at preferred fleet rates applies throughout your relationship—not just on the initial lease but on all future needs.

Flexible Fleet Expansion - Discounted pricing and preference on additional units for short-term needs, seasonal demands, or fleet growth.

A true partnership that grows with your business needs.

7-d. Financial Predictability

Fixed Costs, No Surprises - Lease payments remain fixed throughout the term, making budgeting straightforward and reliable.

Ownership Cost Reality:

- Year 1: Predictable (warranty coverage)
- Year 2: Rising & unpredictable costs
- Year 3: Accelerating expenses
- Beyond Year 3: Maximum uncertainty
- PLUS: Depreciation concerns
- PLUS: Disposal challenges

RDK Lease Cost Reality:

- Year 1: Fixed monthly payment
- Year 2: Fixed monthly payment
- Year 3: Fixed monthly payment
- End of Term: Simple transition to new equipment
- NO surprise repair bills
- NO disposal headaches

8. Technology & Regulatory Advantages

Stay Current, Stay Compliant - The refuse industry faces rapidly evolving technology and tightening regulations. Your fleet strategy must account for both.

Technology Obsolescence Refuse vehicle technology evolves rapidly, particularly in:

- Emission control systems
- Fuel efficiency improvements
- Safety features and monitoring
- Diagnostic capabilities
- Operational efficiency systems

3-year lease cycles ensure you operate current technology

Regulatory Compliance Requirements continue tightening:

- Emission standards evolving
- Safety regulations expanding
- Environmental compliance
- Municipal contract requirements
- State and federal mandates

Leasing provides flexibility to adapt without being trapped in non-compliant assets Ownership locks capital into depreciating, potentially obsolete assets

★ Info believed accurate but not guaranteed; specs and prices may change. We apologize for any errors.

9. Side-by-Side Comparison

Factor

- Warranty Structure
- Year 1 Costs
- Year 2-3 Costs
- Technical Support
- Fleet Support
- Technology
- End of Term
- Capital Required
- Pricing on Additional Units

Ownership Reality:

- Split between chassis & body dealers - finger pointing
- Warranty provides some coverage, but coordination issues
- Escalating, unpredictable repair expenses
- Must develop internally or manage multiple vendors
- Limited to owned vehicles only
- Locked into aging technology
- Disposal challenges, uncertain residual value
- Significant upfront investment
- Standard retail pricing

RDK Lease Reality:

- Warranty Structure: Single point of accountability
- Fixed payment, full coverage
- Same fixed payment, all repairs covered
- Training provided, components supplied
- Available for entire fleet
- New equipment every 3 years
- Simple transition to new fleet
- Capital preserved for operations
- Preferred fleet pricing throughout partnership

10. The Real Question

It's Not Simply Lease vs. Purchase

The question is whether to shoulder the full complexity and risk of owning sophisticated refuse vehicles...

OR

...partner with an organization that assumes that responsibility while providing expertise, support, and pricing advantages that extend across your entire fleet

11. Why RDK? - The Complete Solution

We Eliminate Pain Points:

- Warranty fragmentation
- Technical complexity
- Maintenance burden
- Financial unpredictability
- Technology obsolescence
- Disposal challenges

We Provide Value:

- Single-source accountability
- Complete warranty coverage
- Technical training & support
- Fleet-wide partnership
- Preferred pricing structure
- Operational focus

The RDK Difference: We don't just lease trucks. We transform vehicle acquisition from a capital-intensive ownership challenge into a managed operational expense with predictable costs and superior support.

12. Next Steps

Ready to Discuss Your Fleet Needs? Let's explore how RDK's lease program can work for your operation.

Contact RDK Today - Let's build a fleet solution that works for you

Company Overview

RDK Truck Sales is an established truck dealership with over 28 years of proven experience serving municipal and commercial clients since 1997. We specialize in providing comprehensive solutions for municipal vehicle fleets, including refuse trucks, grapple trucks, and roll-off trucks as well as custom configurations to meet the needs of our customers.

CORE QUALIFICATIONS

Extensive Industry Experience

- Over 28 years of continuous operation in the truck industry (1997-2025)
- Established track record of serving municipal government clients
- Deep understanding of public sector procurement requirements and compliance standards

Compliance and Reliability

- Established business operations with verified track record
- Understanding of municipal contracting requirements and procedures
- Commitment to meeting delivery schedules and service level agreements
- Proper licensing and insurance coverage for municipal contracting

Municipal Fleet Expertise

- Specialized knowledge of municipal vehicle requirements and specifications
- Understanding of heavy-duty applications and demanding service conditions
- Experience with fleet maintenance schedules and emergency repair needs
- Familiarity with municipal budget cycles and procurement processes

Service Capabilities

- Reliable supply chain management ensuring consistent parts availability
- Competitive pricing structures suitable for municipal budgets
- Responsive customer service with understanding of municipal operational requirements
- Ability to handle both routine maintenance supplies and emergency repair situations

Comprehensive Parts Inventory

RDK Truck Sales maintains an extensive inventory including but not limited to:

- Refuse Vehicle Components: Hydraulic systems, compaction units, hopper assemblies, tailgate seals, control valves, and specialized refuse truck parts
- Chassis Parts: Frame components, suspension systems, steering assemblies, and structural elements, lighting, electrical systems components, and engine components
- General Maintenance Parts: Filters, belts, hoses, brake components, and routine service items

Who is RDK?

RDK Truck Sales located in Tampa, Florida, was founded by Richard D. Kemner in July of 1997. Richard Kemner has over 38 years of experience in the waste industry and has extensive knowledge of the operations of waste hauling companies and their needs. RDK provides new, used, and reconditioned refuse equipment as well as garbage trucks including roll-offs, front loaders, rear loaders, side loaders, recycling trucks, cab & chassis, and grapple trucks. Since its conception, RDK has expanded into the garbage truck service, parts, rental, financing, and leasing departments to become a dominant leader in the waste and recycling industry. RDK specializes in assisting local and state municipalities, as well as start-up companies, with their new and used refuse equipment needs.

RDK Truck Sales prides itself on providing superior customer satisfaction and service by employing some of the most highly skilled and experienced staff who maintain high standards of honesty and integrity, the same principles on which the company was founded. We have thousands of satisfied and repeat customers and provide prompt delivery anywhere in the world.

RDK Truck Sales isn't just a dealer of refuse equipment- RDK plays an active role in supporting the waste and recycling industries. RDK is a proud member and/or sponsor of several professional trade organizations including Institute of Scrap Recycling Industries, Inc. (ISRI), Waste Equipment Technology Association (WASTEC), National Solid Wastes Management Association (NSWMA), FLAGFA, APWA, League of Cities, League of Mayors and regularly participates in various industry related trade shows, such as the Waste Expo, FLAGFA and SWANA.

Who Is TruckMax?

Truckmax Inc. founded by Joseph De Maria, is a leader in the vocational truck industry in South and Central Florida and is headquartered in Miami. Mr. De Maria's background in the truck dealership industry spans over fifty years. He has surrounded himself with key personnel that are experienced in the vocational markets and remain with the company to this day.

De Maria's experience has brought a unique perspective to the vocational truck industry. With the specialized markets we target, we understand the importance of having quality, ready-to-go trucks in stock for our customers.

Truckmax is also prepared to quickly customize units to meet any customer's specific needs. With a fully equipped fabrication and installation center, there is no customization that is off limits to our engineers. This off site fabrication facility consist of a 26,000 square-foot building and sits on three acres of land.

As part of Truckmax's unique ready-to-go model, it has only selected a limited number of brands based on quality and integrity. This allows us to focus on those markets and truly put our expertise to work for our customers.

Truckmax is a franchised dealer for Isuzu, Hino, Volvo trucks, as well as Jerr Dan Towing Equipment. Truckmax is also a licensed retailer for Landoll, Stellar, Dur-a-Lift, Reading, Landscape USA, Morgan, C&M, Gar-P bodies, and others.

Truckmax has been the leader in sales and service in South Florida. Truckmax has 5 locations throughout South/Central florida including Miami, Tampa, Naples, Ft. Pierce and Homestead.

At TruckMax customer care is important to our success and we are proud to have accomplished the profound level of service offering our customers continued satisfaction and loyalty.
